

## GHS Services

### What is GHS?

The Globally Harmonized System of Classification and Labelling Chemicals (GHS) is the universal system used to classify chemicals by the types of hazards they pose, while also communicating those hazards in an efficient manner.

It aims to provide the basis for harmonizing the rules and regulations for chemical classification at a regional, national and worldwide level through the use of Safety Data Sheets (SDSs) and labels.

### Why is GHS important?

- It is essential documentation for product customs clearance;
- It is the globally recognized method of product hazardous assessment;
- It is a valuable tool for information exchange within a supply chain; and
- It is a vital instruction for operation and emergency handling.

### Why Choose CIRS?

We author 4,000+ global SDSs and labels each year.

We provide global compliance services tailored to your needs.

We provide high quality services with universal customs acceptability.

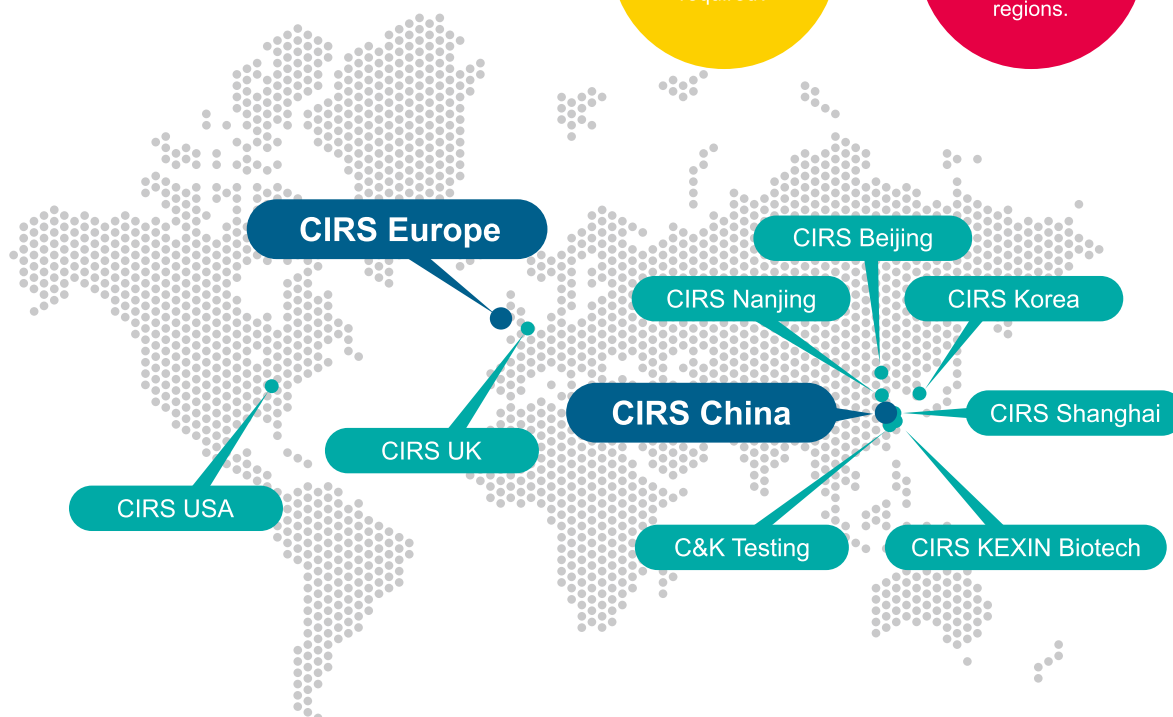

We have a professional dedicated team with extensive experience.

## CIRS Services
